

Specialist Mental Health Service for Bury, Rochdale, Oldham, Stockport, Tameside and Glossop

Pennine Care NHS Trust, Interactive Whiteboard Solution

We had requirements of 3x Smartboards in our new Trust Headquarters, but also Smartboards in several of our mental health facilities, there were several problems associated with installing these systems, in terms of radiant ceiling panels in terms of locating projectors etc, but also in terms of ligature points from the ceiling for patients.

Chris Parkin - Pennine Care NHS Trust

The Solution

On site visits with Leapfrog to project manage the installations at Headquarters, this was more co-ordinating around the contractor and building site issues on quite a complex scheme.

For our mental health Wards Leapfrogs innovative products allowed us to achieve a very practical and positive solution as we couldn't put a projector in the correct place in the ceiling due to ceiling mounted radiator panels but instead a projector on arm from the Smartboard provided the same outcome.

For another Ward we had a lounge / dining room but we also wanted it to be an interactive room for service users but a ceiling mounted projector would have been a ligature point, but Leapfrog provided a system that released from within the ceiling on a motorised arm meaning at other times it was out of site out of mind.

The Outcome

I know whatever the system we require in sometimes difficult circumstances Leapfrog will always come up with a solution and always to the timescales I need them by, their track record speaks for themselves.
