

Rumworth School, Various AV & IT Solutions

Rumworth School caters for students with Learning difficulties and complex needs aged 11 to 19.

Rumworth believes that technology has a major role in motivating and educating young people of all abilities and have put a lot of resources into this area including interactive whiteboards in every classroom. As a school we are very proud of being judged as 'Outstanding' by OFSTED (March 2006) however are still keen to improve.

Rumworth is a Leading edge school and has amongst other things promoted the use of ICT across the curriculum in other schools. Our most recent accolade was to become a Specialist School in Communication and Interaction (September 2008). This will mean a huge development in the use of media to not only promote learning but also record achievement. *Kevin Wilkinson - Deputy Headteacher*

Requirements

An important part of becoming a specialist school is working with the wider community. Working with local businesses is a key issue. Leapfrog are not simply a supplier of ICT solutions for the school but seen as more of a partner of our specialism.

The Solution

There is very rarely 'one solution' but often the options can be both time consuming to research and often difficult to identify what may not be suitable once purchased. (i.e. the brochures and related information are always very positive).

Leapfrog not only are prepared to demonstrate a range of solutions but also prepared to give excellent back up.

As a school Leapfrog staff know we are keen to develop new approaches with our students and will contact us with new products and offer demonstrations.

The Outcome

We are pleased to have Leapfrog as a partner in our specialism as it works as a two way process.

We may not always agree but a lot has changed and happened through constructive discussion.
